

## **In Memoriam Dr. Terrence J. Frest**

“Dr. Terry Frest received his PhD in 1983 from the University of Iowa. His dissertation was titled “Studies of Silurian echinoderms.” Since receiving his PhD, Dr. Frest has been an associate professor, lecturer on various topics of paleobiology and malacology. He has also consulted for various state and federal fish and wildlife organizations, providing expertise. He has developed national recovery plans for rare and endangered molluscs (freshwater and terrestrial) and has conducted extensive field surveys of various freshwater and terrestrial ecosystems throughout North America. His malacological publications date to 1981.”

He was the first collections manager at the Burke Museum of Natural History in Seattle, Washington and later became the senior partner in Deixis Consultants in Seattle, a company that he founded. He died on April 10th at the age of 58.

IN LOVING MEMORY  
**TERRENCE J. FREST**

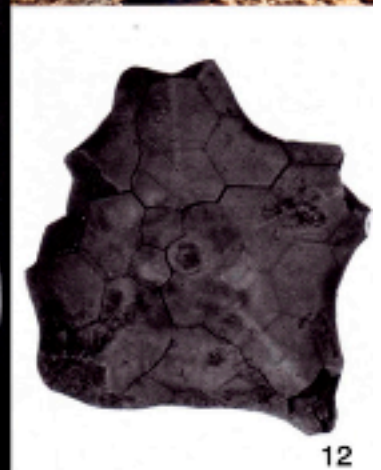

Born: July 28, 1949- East Moline, IL  
Died: April 10, 2008- Seattle, WA

Each shell, each crawling insect holds a rank  
Important in the plan of Him who framed  
This scale of beings; holds a rank, which lost  
Would break the chain and leave behind a gap  
Which Nature's self would rue.

-Stillingfleet, quoted in Tryon (1882)
